

A complete supplier for the modern shooting range

KONGSBERG eScore™

Target: H3A

The H3A eScore target is designed for big bore rifle ranges of 100m and above. It is a great fit for hunters and sport shooters.

The H3A is based on the newest generation target based on acoustic closed chamber technology. This solution provides several advantages, such as:

- Extreme accurate scoring
- Automatically adapt to caliber and projectile speed.
- Possibility to install targets side-by-side, without reduction of system performance or scoring accuracy.
- Not affected by any weather conditions.
- Affordable

Target silhouettes can be changed in seconds, and accurately, by use of the fitted fixation pins.

The H3A target is equipped with an acoustic sensor in each corner to detect the shots, and two temperature sensors to compensate for temperature differences. This ensures extreme accuracy for every shot.

The targets for **KONGSBERG eScore™** automatically adapt to the shooting distance and the caliber in use. In addition, a Built in Test (BiT) is continuously running to detect any faults or reduced performance.

The **KONGSBERG eScore™** system and its targets are based on communication on the TCP/IP protocol. This way, numerous networking equipment are available to setup a shooting range. Both wired and wireless options exist.

The **KONGSBERG eScore™** systems automatically connects to the Kongsberg Cloud services (if the system includes an eHub and is connected to internet) – thus utilizes several new ground-breaking features.

RECOMMENDED USE:

- Big bore shooting
- Ranges: 100 meters and above
- Supersonic ammunition

TECHNICAL:

Dimensions:

A..... 1300mm
B..... 1800mm
C..... 100mm

Detection area:

D 1000mm
E 1200mm

SPECIFICATION:

Temperature:	-30°C to +60°C
Weight:	30kg +/-1.5kg (without stand and armor)
Accuracy:	Equal to or better than the ISSF requirements for 300-meter rifle (ISSF Level 1 certification is pending).
