

DESCRIPTION:

TARGET MODEL: H4H

The H4H eScore target is designed for small caliber and big bore rifle shooting at ranges of 300 and above. It is a great fit for sport shooters.

The H4H is based on the newest generation target based on acoustic closed chamber technology. This solution provides several advantages, such as:

- Extreme accurate scoring
- Automatically adapt to caliber and projectile speed.
- Possibility to install targets side-by-side, without reduction of system performance or scoring accuracy.
- Not affected by weather conditions.
- Affordable

Target silhouettes can be changed in seconds, and accurately, by use of the fitted fixation pins.

The H4H target is equipped with an acoustic sensor in each corner to detect the shots, and two temperature sensors to compensate for temperature differences. This ensures extreme accuracy for every shot.

The target is one of several target models for the **Kongsberg eScore** system.

The targets for **Kongsberg eScore** automatically adapt to the shooting distance and the caliber in use. In addition, a Built in Test (BiT) is continuously running to detect any faults or reduced performance.

The **Kongsberg eScore** system and its targets are based on communication on the TCP/IP protocol. This way, numerous networking equipment are available to setup a shooting range. Both wired and wireless options exist.

The **Kongsberg eScore** systems automatically connects to the Kongsberg Cloud services (if the system is connected to internet) – thus utilizes several new ground-breaking features.

RECOMMENDED USE:

- Big bore rifle shooting
- Ranges: 300 – 1000 meters
- Supersonic ammunition

TECHNICAL:

Dimensions:

A..... 1822mm
B..... 2372mm
C..... 100mm

Detection area:

D 1600mm
E 1600mm

SPECIFICATION:

Temperature:	-30°C to +60°C
Weight:	75kg +/-1.5kg (without stand and armor)
Accuracy:	Equal to, or better than +/- 3 mm, in a radius of 200 mm from the center of the target. Outside this area the accuracy is better than +/- 5 mm.
