

# DESCRIPTION:

# TARGET MODEL: U6B

The U6B eScore target is designed for big bore rifle ranges of 100m and above. It is a great fit for hunters, defense and security forces.

The U6B is based on the newest generation target based on acoustic closed chamber technology. This solution provides several advantages, such as:

- Excellent scoring accuracy
- Automatically adapt to caliber and projectile speed.
- Possibility to install targets side-by-side, without reduction of system performance or scoring accuracy.
- Not affected by any weather conditions.
- Affordable

Target silhouettes can be changed in seconds, and accurately, by use of the fitted fixation pins.

The U6B target has all sensors and electronics at the bottom of the target and can easily be protected from stray bullets behind a berm or with an armor.

The target is one of several target models for the **Kongsberg eScore** system.

The targets for Kongsberg eScore automatically adapt to the shooting distance and the caliber in use. In addition, a Built in Test (BiT) is continuously running to detect any faults or reduced performance.

The **Kongsberg eScore** system and its targets are based on communication on the TCP/IP protocol. This way, numerous networking equipment are available to setup a shooting range. Both wired and wireless options exist.

The **Kongsberg eScore** systems automatically connects to the Kongsberg Cloud services (if the system is connected to internet) – thus utilizes several new ground-breaking features.

## RECOMMENDED USE:

- Big bore shooting
- Ranges: 100 meters and above
- Supersonic ammunition

## TECHNICAL:

### Dimensions:

A..... 1500mm  
B..... 2000mm  
C..... 123mm

### Detection area:

D ..... 1300mm  
E..... 1400mm

## SPECIFICATION:

Temperature:	-30°C to +60°C
Weight:	48kg +/-1.5kg (without stand and armor)
Accuracy:	Equal to, or better than +/- 1.5mm, in a radius of 200 mm from the center of the target. Outside this area the accuracy is better than +/- 4.0mm.
